I (Purchaser) authorize and commission Leland R. Dexter (Manufacturer) to make on my behalf:

\_\_\_\_\_(qty.) Micro-hybrid experimental rocket motor(s) based on a design by Rene Caldera.

\_\_\_\_\_(qty.) Mini-hybrid experimental rocket motor(s) based on a design by Rene Caldera.

In signing this document and submitting this order, Purchaser understands and acknowledges the following:

Experimental rocketry is a potentially dangerous activity. If not assembled, used, and maintained properly, these rocket motors could cause property damage, personal injury, or (while very unlikely) even death. Injuries can include (but are not limited to): severe burns, frostbite, blunt force injury, piercing wounds, and cuts from flying debris. Furthermore, these motors are not toys! They are not recommended for children under 18, unless used under adult supervision. These motors are built with reasonable and prudent care but are not warranted or certified by any licensing agency. Manufacturer will not assume any responsibility for use or misuse of these motors and associated support equipment. It is the sole responsibility of the Purchaser to insure that these motors are used in a safe, prudent, and reasonable manner, and that these motors will not be used if damaged. Purchaser agrees to read and understand the *Basic Micro and Mini-hybrid Safety, Operation and Care* publication (provided with the motor) completely before using these motors. Purchaser is aware that Tripoli Rocketry Association ([www.tripoli.org](http://www.tripoli.org)) has prepared guidelines for experimental rocket launches and Purchaser has read and understands that document. Save this document and a copy of your paid invoice as proof of purchase.
